

DESIGN IT **BEFORE** YOU BUILD IT

PROCESS & PRICING

DEPOSIT

Single view: \$895

A \$250 deposit is required for all rendering projects. Payment can be made via credit card or check, whichever is convenient for you.

PRICING

Two views: \$1,790

A single view rendering is \$895. This comes with limited built in design time to try out different options like paint colors, wheel styles, and other details. Additional views are also \$895 each. These can include side, rear, or engine views. We can discuss what drawings will be necessary to thoroughly express your project visually.

Interiors are often one of the most complicated elements of a build and can cost more. A simple interior rendering follows the typical \$895 price. Detailed interiors usually require a comprehensive package of drawings that starts at \$1,500. All other specialized jobs are billed at \$85/hr.

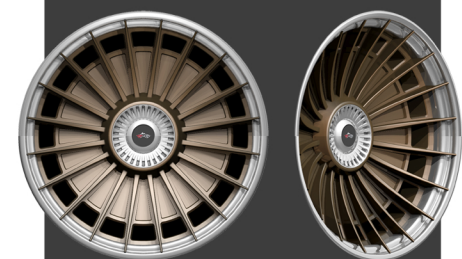

Three views: \$2,685

PAYMENT

Depending on the length of the project, invoices will be issued after each view is completed or at the end of the entire project. Invoices must be paid within 30 days.

WORK FLOW

Component design & custom work: \$85/hr

Communication is key! As a customer you can ensure a higher quality product by thoroughly communicating your wants and needs within the project. This starts with you sending information to HCR about the project (pictures, bulleted list of specs, etc.). HCR will then create drawings to be reviewed by you. We can then adjust the drawings as needed to create a final product.
